

# First Aid Kit Requirements

All Kits, Supplies & Equipment are available at  
St. John Ambulance Mississauga Branch

## Guidelines for Contents of First Aid Boxes

First aid boxes, to be available at all places of employment, provide workers who have first aid training with the equipment they need to offer first aid services quickly and safely. WSIB Regulation 1101 lists the items that must be included in the first aid boxes in workplaces. The quantities of any item specified may be increased to suit the needs of a particular workplace. Personal protective equipment should be included in the first aid kits. Equipment outside the scope of the provision of first aid, which may deteriorate (such as medication and ointment) should not be included in a first aid box. Boxes must be checked a minimum of four times a year to ensure that the contents are in good order.
